

Notice of Intent to Implement HL7 FHIR US Core Implementation Guide STU 4.0.0 for 170.315(g)(10)

Issued December 15th, 2022

Please be advised that SabiaMed Corporation has opted to leverage ONC's SVAP process for the certification criteria at 170.315(g)(10) to adopt the HL7 FHIR US Core Implementation Guide STU 4.0.0 in its Patient and Population API Services.

SabiaMed Corporation plans to adopt the newer version of the standard for the (g)(10) criterion, that will provide better forward compatibility and longevity for the APIs.

The newer version will be compatible with the current version, and thus will not impact interoperability of the affected module.
